11:00 AM  
DOCKET CONTROL

Dear Sir or Madam:

T-01051B-09-0525

This filing is being made on behalf of Qwest Corporation (QC), Entity Code T-01051B.

Enclosed for filing with the Commission is an original plus thirteen (13) copies of a revision to Qwest's Competitive Advanced Communications Services Price Cap Tariff and Qwest's Competitive Private Line Transport Services Price Cap Tariff.

In this filing Qwest Corporation (Qwest) plans to introduce auto-acceptance for all 100 mbps Metro Optical Ethernet (MOE) circuits and below. Under auto-acceptance, billing will commence immediately where the port is available for service and the due date is reached. At the same time auto-acceptance is being introduced, an additional Labor Charge for the configuration of Optical and Ethernet Services is being added to the tariff.

Qwest also plans to add two new bandwidth profile options of 3 mbps and 7 mbps and decrease prices for bandwidth profile options of 10 mbps and below. In addition, Qwest will be adding a new increment for quality of service. A new 3 mbps increment for Priority 1 traffic will be available for the 3, 5, and 7 mbps bandwidth profile options.

As part of this filing Qwest also plans to restructure GeoMax Service. As part of this restructure, Qwest will no longer offer the following GeoMax interfaces (ESCON, ETR, FDDI, ISC, Fibre Channel - 133, 266 and 531 Mbps, and D1 Video), and the Additional Shelf element will be discontinued. Qwest will introduce new GeoMax Fibre Channels 4G and 10G Unprotected and Protected Ports, ISC3 Unprotected and Protected Ports and OC768 Unprotected and Protected Ports. Qwest also plans to increase the Premise Node capacity from 32 ports to 44 wavelengths.

Qwest respectfully requests that these proposed revisions become effective December 16, 2009.

Acknowledgment and date of receipt of this transmittal are requested. A duplicate letter and self-addressed, stamped envelope are attached for this purpose. If you have any questions regarding this filing, please contact me directly.

Sincerely,

Mark Brinton  
Regulatory Support Manager

**3. ORDER AND SERVICE MODIFICATIONS  
AND MISCELLANEOUS CHARGES**

**3.1 ORDER MODIFICATION (Cont'd)**

**3.1.2 CANCELLATION OF ORDER FOR SERVICE**

- A. A customer may cancel an order for the installation of service at any time prior to notification by the Company that service is available for the customer's use. The cancellation date is the date the Company receives written or verbal notice from the customer that the order is to be canceled. The verbal notice must be followed by written confirmation within 10 days. If a customer or a customer's end user is unable to accept service within 30 business days after the original service date[1], the following will occur:

(C)

- The order will be canceled and charges as set forth in D., and E., following, will apply, or
- The service will be activated, at the customer's request, and billing for the service will commence.

In such instances, the cancellation date or the date billing is to commence (depending on which option is selected by the customer), is the 31st business day beyond the original service date of the order.

- B. Service Date Intervals are associated with the provisioning of an order. Certain Critical Dates, as set forth in E., following, are used by the Company to monitor the service order provisioning progress. Cancellation charges are based on the estimated costs incurred by the Company at the time the order is canceled. The Company monitors which Critical Date was last scheduled and determines what percentage of the Company's provisioning costs have been incurred as of that Critical Date. A cancellation charge will not apply if the scheduled Service Date has not been provided to the customer.

Costs incurred in conjunction with the provision of an order start on the Application Date defined in C., following. When a customer cancels an order prior to the Application Date, no charges shall apply. When a customer cancels an order or part of an order, on or after the Application Date, a charge equal to the estimated costs incurred by the Company shall apply as set forth in D. and E., following. When a customer cancels an order or part of an order, on or after the original Service Date, the Cancellation Charge will apply as set forth in D., and E., following.

- [1] Exception: Billing for MOE Service with a Bandwidth Profile of 100 Mbps or less will commence immediately where the port is available for service and the due date is reached.

## 10. METRO OPTICAL ETHERNET (MOE)

### 10.1 DESCRIPTION

#### 10.1.1 GENERAL

Metro Optical Ethernet (MOE) Service is a flexible, easy-to-use transport service that uses established Ethernet transport technology. MOE allows customers to connect multiple enterprise locations within a service area using native Ethernet protocol. MOE is available over three distinct designs: Customer Premises, Central Office and Ethernet with Extended Transport (EwET).

Customer Premises MOE supports transmission speeds as low as 3 Mbps and up to 1 Gbps in increments of 10 Mbps from 10 to 100 Mbps, and in increments of 100 Mbps from 100 to 1,000 Mbps. Central Office MOE supports transmission speeds of 100 Mbps, 600 Mbps and 1,000 Mbps. EwET MOE supports transmission speeds as low as 5 Mbps and up to 40 Mbps. (C)

A MOE customer may request Special Facilities Routing (i.e., Diversity and Avoidance) as set forth in the Access Service Tariff, Section 11.

Technical Specifications for MOE Service are delineated in Qwest Corporation Technical Publication PUB 77411, listed in this Tariff under Reference to Technical Publications.

Issued: 11-16-09

Effective: 12-16-09

## 10. METRO OPTICAL ETHERNET (MOE)

### 10.3 RATE ELEMENTS

#### A. MOE Port

A nonrecurring charge applies per new MOE Port. A nonrecurring charge for a MOE Port will also be assessed when an electrical port is changing to an optical port or an optical port is changing to an electrical port. There will be no charge if a customer goes from one electrical port to another electrical port or from one optical port to another optical port. Customers may choose to connect to an electrical 10/100 port or an electrical or optical 1,000 Mbps port on the Company network. This charge is associated with all three Bandwidth Profile designs.

#### B. Bandwidth Profile

A monthly rate is assessed per Bandwidth Profile subscribed to and the term plan chosen as set forth in 8.8.3, following. Customers may subscribe to one of the following:

##### 1. Customer Premises Bandwidth

- 10 Mbps Ports: 3 Mbps, 5 Mbps, 7 Mbps and 10 Mbps (C)
- 100 Mbps Ports: 3 Mbps, 5 Mbps, 7 Mbps, 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps and 100 Mbps (C)
- 1,000 Mbps Ports: 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps, 100 Mbps, 200 Mbps, 300 Mbps, 400 Mbps, 500 Mbps, 600 Mbps, 700 Mbps, 800 Mbps, 900 Mbps and 1,000 Mbps

##### 2. Central Office Bandwidth

- 1,000 Mbps Ports: 100 Mbps, 600 Mbps and 1,000 Mbps

##### 3. EwET Bandwidth[1]

- 10/100 Mbps Ports: 5 Mbps, 10 Mbps, 20 Mbps, 30 Mbps and 40 Mbps

[1] A Company-provided DS3 Channel Termination and Transport Channel Mileage (for distance between a MOE Central Office Switch and Company Non-MOE Central Office) at rates set forth in Section 6 of the Competitive Private Line Transport Services Price Cap Tariff will be assessed when MOE is connected to EwET. An EwET Customer Interface will also be assessed.

Issued: 11-16-09

Effective: 12-16-09

## 10. METRO OPTICAL ETHERNET (MOE)

### 10.3 RATE ELEMENTS

#### E. Optional Features(Cont'd)

##### 2. Quality of Service

Quality of Service for MOE allows customers to prioritize their traffic in four classes of service. The four different classes of service or levels are Priority 1, Priority 2, Priority 3 and Priority 4. Together they allow customers the ability to match the correct level to their application at monthly rates set forth in 10.5.E, following. The four classes of service or priority levels uses are described below:

- Priority 1 – This Quality of Service class of service supports VoIP (Voice of Internet Protocol) and other near real time applications. A Quality of Service Guarantee is provided in 3, following.
- Priority 2 – This Quality of Service class of service supports interactive Video applications.
- Priority 3 - This Quality of Service class of service supports business data applications.
- Priority 4 - This Quality of Service is the default for all other traffic that is not defined in Priorities 1, 2 or 3 above. Priority 4 traffic will have the lowest priority on the network.

In all Quality of Service options, at least 3 Mbps or 5 Mbps of the Bandwidth Profile will be Priority 1 traffic. Priority 1 traffic is ordered in 3 Mbps or 5 Mbps increments and customers may order multiples of Quality of Service at monthly and Pricing Plan rates set forth in 10.5.E.2, following. The 3 Mbps increment of Priority 1 traffic option is only available for 3 Mbps, 5 Mbps and 7 Mbps Bandwidth Profiles. The 5 Mbps increment of Priority 1 traffic is available for 5 Mbps Bandwidth Profiles and higher.

Each individual Quality of Service reserves either 3 Mbps or 5 Mbps of the Bandwidth Profile for Priority 1 traffic. Customers may order multiple increments, but 3 Mbps and 5 Mbps increments may not be combined. For example: if a customer orders 4 increments of 5 Mbps of Quality of Service the customer would receive 20 Mbps of the Bandwidth Profile for Priority 1 traffic. In addition to the Priority 1 traffic, customers must specify the traffic percentage levels for Priorities 2, 3 and 4 for the remainder of the Bandwidth using the templates are described below:

Issued: 11-16-09

Effective: 12-16-09

## 10. METRO OPTICAL ETHERNET (MOE)

### 10.3 RATE ELEMENTS

#### E. Optional Features

#### 2. Quality of Service(Cont'd)

When Quality of Service is ordered 8 different options or templates will be available. Each template specifies how the remaining Bandwidth Profile will be distributed to Priorities 2, 3 and 4 as set forth in the 8 templates, below:

	<u>Priority 2</u>	<u>Priority 3</u>	<u>Priority 4</u>
Template 1	20%	40%	40%
Template 2	25%	35%	40%
Template 3	30%	30%	40%
Template 4	35%	25%	40%
Template 5	40%	20%	40%
Template 6	45%	15%	40%
Template 7	50%	10%	40%
Template 8	55%	5%	40%

Quality of Service comes with a service guarantee for every 3 or 5 megabit increments of Priority 1 traffic. The SLA credit will be based on a specific calendar month's performance set forth in Section 2.4.4.B., preceding.

## 10. METRO OPTICAL ETHERNET (MOE)

### 10.3 RATE ELEMENTS

#### E. Optional Features(Cont'd)

##### 3. Protect Routing

Protect Routing provides added reliability to MOE transported over fiber optic facilities. Protect Routing provides a separate facility path for the protection system between the serving wire center and the Company point of termination located in the same building as the customers designated premises when the customer or building owner provide the structure for diverse entrance facilities into the building. The Company will bill a monthly Protect Routing Charge as set forth in 10.5.F, following.

This added protection is provided by ensuring that backup electronics and two physically separate facility paths are used in the provisioning of the service. One primary (or working) service path is established between the serving wire center and the customer designated premises. In addition, a protect path is provisioned between the customer designated premises and the serving wire center via a Company designated alternate route. In the event that the working facility or electronics fail or the service performance becomes impaired, the facility automatically switches to the service protect path in order to maintain a near continuous flow of information between locations.

Protect Routing comes with a service guarantee should the continuity between the customer designated premises and serving wire center fail as set forth in Section 2.4.4.B.1, preceding.
